## New MAP and You

Methodist **ACTION** Program

### From the Desk of the Executive Director . . .

Last week marked the beginning of the 2022 hurricane season, and most forecasts are predicting a mean one. In a May 31st statement, Wilmington's Mayor, Michael Purzycki, admitted that there are still families who were displaced by last year's Hurricane Ida who have not recovered permanent housing. The seasonal temperature forecast also reveals that our region is in for above average summer temps. A quick search of "hurricanes" and "climate change" will reveal that as air and water temperatures increase, hurricane intensity and number will also increase, so we very well could be faced with another disastrous storm this season when we have not completely recovered from the last one.

It's not as though we haven't seen this problem coming. Civilizations in ancient Greece are on record as considering how their actions (such as swamp-draining and deforestation) would impact regional rainfall. In 1896, a Scottish scientist first coined the term "greenhouse effect" in talking about how carbon and methane emissions may impact the climate. In 1912, an article in Popular Mechanics suggested that burning coal (which produces an abundance of carbon) would lead to increased temperatures, but erroneously noted that the effect could be centuries away. More than ten years before the first Earth Day, scientists started warning that we should begin preparing for this danger. It wasn't until about 1988 that scientists and some politicians would unite in proposing the need for action, specifically at the Toronto Conference on the Changing Atmosphere.

When I taught my students and my own children about critical thinking, one of my main exhortations when considering who might be responsible for a problem was: "Follow the money." Whoever stood to profit from a particular policy could be counted upon to be developing/supporting it. In this case, in the 1990s, the fossil fuel industry (read: Big Oil) and those opposed to federal or state restrictions put a halt to many actions that would have put us in a better place today.

Now, 99% of climate/environmental scientists believe we are either approaching or already in the midst of a climate crisis. Although Delaware recently enacted a climate plan, it is weak and without teeth. On last Thursday, a bill dropped in the legislature, the Climate Solutions Act, that would tie ALL the boxes to take significant action in addressing Delaware's climate emergency.

On June 9th from 11:00AM to 2:00 PM, there will be a Rally for the Planet, sponsored by the Sierra Club, Delaware Interfaith Power and Light, and many of their partner organizations. (MAP has partnered with Interfaith Power and Light since before I came on as MAP Executive Director.) Numerous legislators and community leaders will offer their views.

A reminder from our Social Principles: *"The adverse impacts of global climate change disproportionately affect individuals and nations least responsible for the emissions. We therefore support efforts of all governments to require mandatory reductions in greenhouse gas emissions and call on individuals, congregations, businesses, industries, and communities to reduce their emissions."* ¶160D Social Principles of the United Methodist Church 2017-2020

We hope that some of you, and your children, will be available to join us on the Legislative Hall steps on June 9th. It is very important that young people participate, because it is their futures that will be impacted the most by this issue.

## *Rally 4 the Planet Event*

**Thursday, June 9 11:00 AM Legislative Hall/Dover**

Now it's ever more important to show up for the *Rally 4 the Planet* we are organizing at Legislative Hall on June 9

We need a 50% reduction in greenhouse gas emissions by 2030 and a strong net-zero goal by 2050. We need all state agencies at the table to make sure we will be able to meet these goals, and we need the climate action plan to be updated every 5 years. To put it very clearly, we need bold action!

We know that a bill is being drafted, but we also know that time is running out on both this legislative session and our ability to address this crisis. The opposition to renewable energy and climate science will attack whatever comes next. We need to turn up on June 9th and show the legislature that Delaware wants—no, needs—climate action to be a priority in 2022.

Will you join us? This is not the time to sit on the sidelines.. this is the time to show up!! Bring a friend or two. If you can offer a car ride or would like car ride. Please email back and we can make arrangements.

Register to attend on June 9 at 11:00AM at:

## Foster Parenting - Cayuga Centers of Delaware

My name is Andrea McCoy-Carty, Foster Parent Ambassador for Cayuga Centers of Delaware. As Foster Parent Ambassador, my goal is to provide pragmatic strategies and resources for recruiting and retaining foster families. Thus, continuing to provide a pool of prospective and well-trained applicants for foster care licensure, while assisting in community outreach.

The key is working together with other professionals and stakeholders in designing and planning fostering services. Most foster parents find the work rewarding but often describe it as demanding as they manage challenging situations

Fostering with Cayuga Centers means, receiving daily support from empathetic staff all while respecting "social distance". Stability is the key factor for the foster youth in achieving positive outcomes.
